

29 July 1976

MEMORANDUM FOR THE RECORD

SUBJECT: E.O. 11905 Working Group Meeting, 28 July 1976

STAT

1. [] Chairman of the working group, opened the meeting with an explanation of its purpose. It was his understanding that the White House may be reviewing the executive order with a view to polishing its language. He believes there are groups working elsewhere in the government to identify those changes they would like to see made in the executive order, if the opportunity presents itself.

2. The charter of the working group will be to define CIA departmental problems, not Community problems. The working group will assemble a list and then decide whether to push for early revision of the order or merely to have the list ready when an opportunity presents itself.

3. [] of the DDO had a preliminary list of DDO problems ready for this meeting. She will refine it; we were asked to compile a list of problems relevant to our component's activities. I propose at this point not to contribute to this list, primarily on the grounds that our products are not departmental, and because I do not believe we have any particular problems with the order. I will, therefore, continue to participate in the group, but passively.
